

## **South Dakota Mission: Lifeline 2013 Supplemental Mini-Grant Summary**

Mission: Lifeline® was created by the American Heart Association as a response to missed opportunities for prompt, appropriate STEMI patient treatment. Recently, Mission: Lifeline expanded to help existing STEMI systems of care incorporate out-of-hospital cardiac resuscitation into their systems.

The purpose of the South Dakota Mission: Lifeline Supplemental Mini-Grant was to continue to enhance the infrastructure within EMS agencies and referral hospitals for treatment of the STEMI patient. Applications demonstrated upgrades and equipment needs to improve the STEMI system of care in South Dakota. The Mission: Lifeline initiative has been able to provide this through the generous contribution of The Leona M. and Harry B. Helmsley Charitable Trust.

Total number of submissions:	38
Total number of agencies funded:	18
Total amount of funds requested:	\$667,425.05
